प्रश्न-पत्र कोड
Q.P. Code **30/1/3**

परीक्षार्थी प्रश्न-पत्र कोड को उत्तर-पुस्तिका के मुख-पृष्ठ पर अवश्य लिखें।

Candidates must write the Q.P. Code on the title page of the answer-book.

गणित (मानक) – सैद्धान्तिक

MATHEMATICS (Standard) – Theory

निर्धारित समय : 3 घण्टे

Time allowed : 3 hours

अधिकतम अंक : 80

Maximum Marks : 80

नोट / NOTE :

- (i) कृपया जाँच कर लें कि इस प्रश्न-पत्र में मुद्रित पृष्ठ 23 हैं।
Please check that this question paper contains 23 printed pages.
- (ii) प्रश्न-पत्र में दाहिने हाथ की ओर दिए गए प्रश्न-पत्र कोड को परीक्षार्थी उत्तर-पुस्तिका के मुख-पृष्ठ पर लिखें।
Q.P. Code given on the right hand side of the question paper should be written on the title page of the answer-book by the candidate.
- (iii) कृपया जाँच कर लें कि इस प्रश्न-पत्र में 38 प्रश्न हैं।
Please check that this question paper contains 38 questions.
- (iv) कृपया प्रश्न का उत्तर लिखना शुरू करने से पहले, उत्तर-पुस्तिका में प्रश्न का क्रमांक अवश्य लिखें।
Please write down the serial number of the question in the answer-book before attempting it.
- (v) इस प्रश्न-पत्र को पढ़ने के लिए 15 मिनट का समय दिया गया है। प्रश्न-पत्र का वितरण पूर्वाह्न में 10.15 बजे किया जाएगा। 10.15 बजे से 10.30 बजे तक परीक्षार्थी केवल प्रश्न-पत्र को पढ़ेंगे और इस अवधि के दौरान वे उत्तर-पुस्तिका पर कोई उत्तर नहीं लिखेंगे।
15 minute time has been allotted to read this question paper. The question paper will be distributed at 10.15 a.m. From 10.15 a.m. to 10.30 a.m., the candidates will read the question paper only and will not write any answer on the answer-book during this period.

### General Instructions :

Read the following instructions carefully and follow them :

- (i) This question paper contains **38** questions. **All** questions are compulsory.
- (ii) This Question Paper is divided into **FIVE** Sections – **Section A, B, C, D and E**.
- (iii) In Section–A question number **1** to **18** are **Multiple Choice Questions (MCQs)** and question number **19 & 20** are **Assertion-Reason** based questions of **1** mark each.
- (iv) In Section–B question number **21** to **25** are **Very Short-Answer-I (SA-I)** type questions of **2** marks each.
- (v) In Section–C question number **26** to **31** are **Short Answer-II (SA-II)** type questions carrying **3** marks each.
- (vi) In Section–D question number **32** to **35** are **Long Answer (LA)** type questions carrying **5** marks each.
- (vii) In Section–E question number **36** to **38** are **Case Study / Passage based integrated units of assessment** questions carrying **4** marks each. Internal choice is provided in **2** marks question in each case-study.
- (viii) There is no overall choice. However, an internal choice has been provided in **2** questions in Section–B, **2** questions in Section–C, **2** questions in Section–D and **3** question in Section–E.
- (ix) Draw neat figures wherever required. Take  $\pi = \frac{22}{7}$  wherever required if not stated.
- (x) Use of calculator is **NOT** allowed.

## SECTION - A

### (Multiple Choice Questions)

Each question is of 1 mark.

1. Curved surface area of a cylinder of height 5 cm is  $94.2 \text{ cm}^2$ . Radius of the cylinder is (Take  $\pi = 3.14$ )  
(A) 2 cm (B) 3 cm  
(C) 2.9 cm (D) 6 cm

2. The distribution below gives the marks obtained by 80 students on a test :

| Marks              | Less than 10 | Less than 20 | Less than 30 | Less than 40 | Less than 50 | Less than 60 |
|--------------------|--------------|--------------|--------------|--------------|--------------|--------------|
| Number of Students | 3            | 12           | 27           | 57           | 75           | 80           |

The modal class of this distribution is :

(A)  $10 - 20$  (B)  $20 - 30$   
(C)  $30 - 40$  (D)  $50 - 60$

3. The area of metal sheet required to make a closed hollow cylinder of height 2.4 m and base radius 0.7 m, is  
(A)  $10.56 \text{ m}^2$  (B)  $13.52 \text{ m}^2$   
(C)  $13.64 \text{ m}^2$  (D)  $14.08 \text{ m}^2$

4. The distance between the points  $(0, 2\sqrt{5})$  and  $(-2\sqrt{5}, 0)$  is  
(A)  $2\sqrt{10}$  units (B)  $4\sqrt{10}$  units  
(C)  $2\sqrt{20}$  units (D) 0

5. If  $\alpha, \beta$  are zeroes of a polynomial  $p(x) = 2x^2 - x - 1$  then  $\alpha^2 + \beta^2$  is equal to  
(A)  $\frac{-3}{4}$  (B)  $\frac{5}{4}$   
(C)  $\frac{1}{4}$  (D)  $\frac{3}{4}$

6. The least positive value of  $k$ , for which the quadratic equation  $2x^2 + kx - 4 = 0$  has rational roots, is  
(A)  $\pm 2\sqrt{2}$  (B) 2  
(C)  $\pm 2$  (D)  $\sqrt{2}$

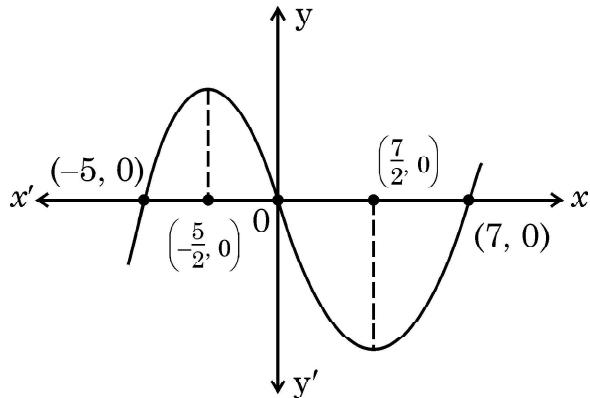

7.  $\left[ \frac{3}{4} \tan^2 30^\circ - \sec^2 45^\circ + \sin^2 60^\circ \right]$  is equal to

(A) -1  
(C)  $-\frac{3}{2}$

(B)  $\frac{5}{6}$   
(D)  $\frac{1}{6}$

8. The graph of  $y = p(x)$  is given in the adjoining figure. Zeroes of the polynomial  $p(x)$  are

(A) -5, 7  
(B)  $-\frac{5}{2}, -\frac{7}{2}$   
(C) -5, 0, 7  
(D)  $-5, -\frac{5}{2}, \frac{7}{2}, 7$

9. The value of  $k$  for which the pair of equations  $kx = y + 2$  and  $6x = 2y + 3$  has infinitely many solutions,

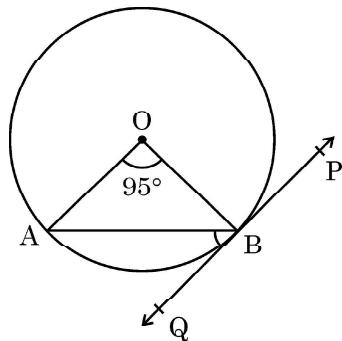

(A) is  $k = 3$   
(C) is  $k = -3$   
(B) does not exist  
(D) is  $k = 4$

10. If  $p - 1$ ,  $p + 1$  and  $2p + 3$  are in A.P., then the value of  $p$  is

(A) -2  
(C) 0  
(B) 4  
(D) 2

11. In what ratio, does  $x$ -axis divide the line segment joining the points  $A(3, 6)$  and  $B(-12, -3)$ ?

(A) 1 : 2  
(C) 4 : 1  
(B) 1 : 4  
(D) 2 : 1

(A) 17.5 (B) 12.5  
(C)  $85^\circ$  (D)  $95^\circ$

15. If  $2 \tan A = 3$ , then the value of  $\frac{4 \sin A + 3 \cos A}{4 \sin A - 3 \cos A}$  is  
(A)  $\frac{7}{\sqrt{13}}$  (B)  $\frac{1}{\sqrt{13}}$   
(C) 3 (D) does not exist

16. In a survey, it is found that every fifth person has a vehicle. The probability of a person NOT having a vehicle, is  
(A)  $\frac{1}{5}$  (B) 5%  
(C)  $\frac{4}{5}$  (D) 95%

17. If the value of each observation of a statistical data is increased by 3, then the mean of the data

(A) remains unchanged (B) increases by 3  
(C) increases by 6 (D) increases by  $3n$

18. Which of the following is a quadratic polynomial having zeroes  $\frac{-2}{3}$  and  $\frac{2}{3}$  ?

(A)  $4x^2 - 9$  (B)  $\frac{4}{9}(9x^2 + 4)$   
(C)  $x^2 + \frac{9}{4}$  (D)  $5(9x^2 - 4)$

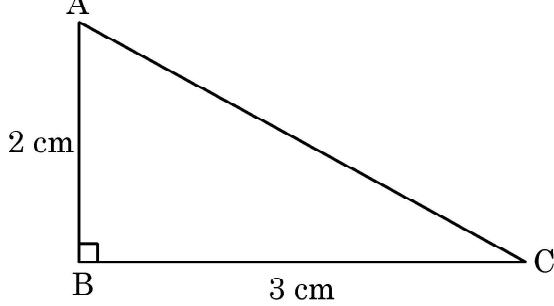

### Assertion-Reason Type Questions

In Question 19 and 20, an **Assertion (A)** statement is followed by a statement of **Reason (R)**. Select the correct option out of the following :

(A) Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A).  
(B) Both Assertion (A) and Reason (R) are true but Reason (R) is not the correct explanation of Assertion (A).  
(C) Assertion (A) is true but Reason (R) is false.  
(D) Assertion (A) is false but Reason (R) is true.

19. **Assertion (A)** : The perimeter of  $\triangle ABC$  is a rational number.

**Reason (R)** : The sum of the squares of two rational numbers is always rational.

20. **Assertion (A)** : Point  $P(0, 2)$  is the point of intersection of  $y$ -axis with the line  $3x + 2y = 4$ .

**Reason (R)** : The distance of point  $P(0, 2)$  from  $x$ -axis is 2 units.

## SECTION - B

(This section comprises of Very Short Answer (SA-I) type questions. Every question is of 2 marks.)

21. (a) If  $\sin \theta + \sin^2 \theta = 1$ , then prove that  $\cos^2 \theta + \cos^4 \theta = 1$ .

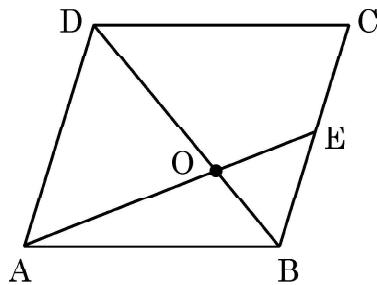

**OR**

(b) If  $\tan \theta = \frac{1}{\sqrt{7}}$ , then show that  $\frac{\operatorname{cosec}^2 \theta - \sec^2 \theta}{\operatorname{cosec}^2 \theta + \sec^2 \theta} = \frac{3}{4}$ .

22. Find the greatest number which divides 85 and 72 leaving remainders 1 and 2 respectively.

23. A bag contains 4 red, 3 blue and 2 yellow balls. One ball is drawn at random from the bag. Find the probability that drawn ball is  
(i) red (ii) yellow.

24. In the given figure, ABCD is a parallelogram. AE divides the line segment BD in the ratio 1 : 2. If BE = 1.5 cm, then find the length of BC.

25. (a) Solve the pair of equations  $x = 3$  and  $y = -4$  graphically.

**OR**

(b) Using graphical method, find whether following system of linear equations is consistent or not :

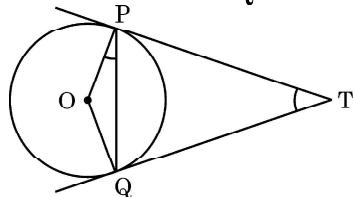

$$x = 0 \text{ and } y = -7$$

### SECTION - C

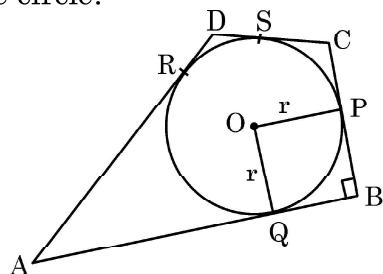

(This section comprises of Short Answer (SA-II) type questions of 3 marks each.)

26. (a) Two tangents  $TP$  and  $TQ$  are drawn to a circle with centre  $O$  from an external point  $T$ . Prove that  $\angle PTQ = 2\angle OPQ$ .

**OR**

(b) In the given figure, a circle is inscribed in a quadrilateral  $ABCD$  in which  $\angle B = 90^\circ$ . If  $AD = 17$  cm,  $AB = 20$  cm and  $DS = 3$  cm, then find the radius of the circle.

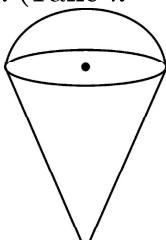

27. Prove that :  $2(\sin^6 \theta + \cos^6 \theta) - 3(\sin^4 \theta + \cos^4 \theta) + 1 = 0$ .

28. (a) A room is in the form of cylinder surmounted by a hemi-spherical dome. The base radius of hemisphere is one-half the height of cylindrical part. Find total height of the room if it contains  $\left(\frac{1408}{21}\right)$   $\text{m}^3$  of air.  $\left(\text{Take } \pi = \frac{22}{7}\right)$

**OR**

(b) An empty cone is of radius 3 cm and height 12 cm. Ice-cream is filled in it so that lower part of the cone which is  $\left(\frac{1}{6}\right)^{\text{th}}$  of the volume of the cone is unfilled but hemisphere is formed on the top. Find volume of the ice-cream. (Take  $\pi = 3.14$ )

29. If  $(-5, 3)$  and  $(5, 3)$  are two vertices of an equilateral triangle, then find coordinates of the third vertex, given that origin lies inside the triangle. (Take  $\sqrt{3} = 1.7$ )

30. Prove that  $\sqrt{5}$  is an irrational number.

31. Jaya scored 40 marks in a test getting 3 marks for each correct answer and losing 1 mark for each incorrect answer. Had 4 marks being awarded for each correct answer and 2 marks were deducted for each incorrect answer then Jaya again would have scored 40 marks. How many questions were there in the Test ?

#### SECTION – D

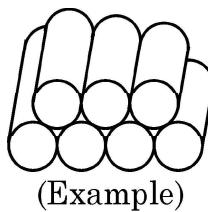

**(This section comprises of Long Answer (LA) type questions of 5 marks each.)**

32. A chord of a circle of radius 14 cm subtends an angle of  $60^\circ$  at the centre. Find the area of the corresponding minor segment of the circle. Also find the area of the major segment of the circle.

33. (a) The ratio of the 11<sup>th</sup> term to 17<sup>th</sup> term of an A.P. is 3 : 4. Find the ratio of 5<sup>th</sup> term to 21<sup>st</sup> term of the same A.P. Also, find the ratio of the sum of first 5 terms to that of first 21 terms.

**OR**

(b) 250 logs are stacked in the following manner :  
22 logs in the bottom row, 21 in the next row, 20 in the row next to it and so on (as shown by an example). In how many rows, are the 250 logs placed and how many logs are there in the top row ?

34. (a) Sides AB and AC and median AM of a  $\triangle ABC$  are proportional to sides DE and DF and Median DN of another  $\triangle DEF$ . Show that  $\triangle ABC \sim \triangle DEF$ .

**OR**

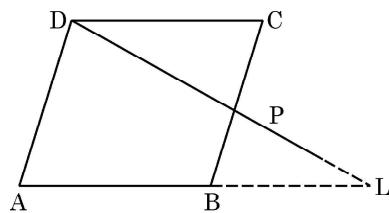

(b) ABCD is a parallelogram, P is a point on side BC and DP when produced meets AB produced at L. Prove that

(i)  $\frac{DP}{PL} = \frac{DC}{BL}$

(ii)  $\frac{DL}{DP} = \frac{AL}{DC}$

(iii) If  $LP : PD = 2 : 3$  then find  $BP : BC$ .

35. An aeroplane when flying at a height of 3000 m from the ground passes vertically above another aeroplane at an instant when the angles of elevation of the two planes from the same point on the ground are  $60^\circ$  and  $45^\circ$  respectively. Find the vertical distance between the aeroplanes at that instant. Also, find the distance of first plane from the point of observation. (Take  $\sqrt{3} = 1.73$ )

#### SECTION – E

**(In this section, there are 3 case study/passage based questions. Each question is of 4 marks.)**

##### Case Study

36. India meteorological department observes seasonal and annual rainfall every year in different sub-divisions of our country.

It helps them to compare and analyse the results. The table given below shows sub-division wise seasonal (monsoon) rainfall (mm) in 2018 :

| <b>Rainfall (mm)</b> | <b>Number of Sub-divisions</b> |
|----------------------|--------------------------------|
| 200-400              | 2                              |
| 400-600              | 4                              |
| 600-800              | 7                              |
| 800-1000             | 4                              |
| 1000-1200            | 2                              |
| 1200-1400            | 3                              |
| 1400-1600            | 1                              |
| 1600-1800            | 1                              |

Based on the above information, answer the following questions :

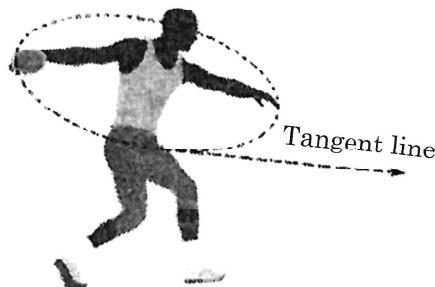

(I) Write the modal class. 1  
(II) Find the median of the given data. 2

**OR**

Find the mean rainfall in this season.

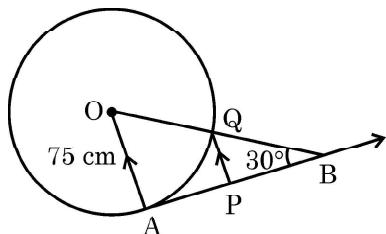

(III) If sub-division having at least 1000 mm rainfall during monsoon season, is considered good rainfall sub-division, then how many sub-divisions had good rainfall ? 1

37. The discus throw is an event in which an athlete attempts to throw a discus. The athlete spins anti-clockwise around one and a half times through a circle, then releases the throw. When released, the discus travels along tangent to the circular spin orbit.

In the given figure, AB is one such tangent to a circle of radius 75 cm. Point O is centre of the circle and  $\angle ABO = 30^\circ$ . PQ is parallel to OA.

Based on above information :

- (a) find the length of AB. 1
- (b) find the length of OB. 1
- (c) find the length of AP. 2

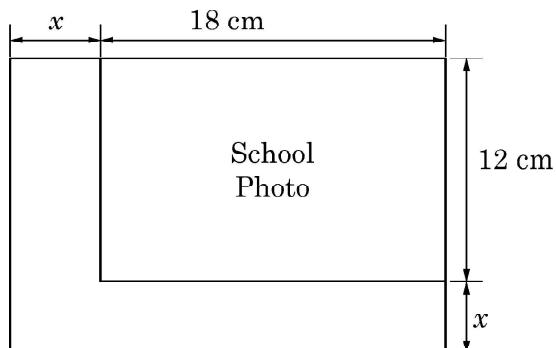

**OR**

find the length of PQ.

38. While designing the school year book, a teacher asked the student that the length and width of a particular photo is increased by  $x$  units each to double the area of the photo. The original photo is 18 cm long and 12 cm wide.

Based on the above information, answer the following questions :

- (I) Write an algebraic equation depicting the above information. 1
- (II) Write the corresponding quadratic equation in standard form. 1
- (III) What should be the new dimensions of the enlarged photo ? 2

**OR**

Can any rational value of  $x$  make the new area equal to  $220 \text{ cm}^2$  ?

\_\_\_\_\_

**Marking Scheme**  
**Strictly Confidential**  
**(For Internal and Restricted use only)**  
**Secondary School Examination, 2023**  
**MATHEMATICS PAPER CODE 30/1/3**

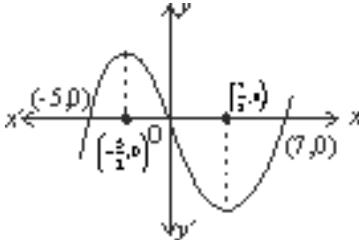

**General Instructions: -**

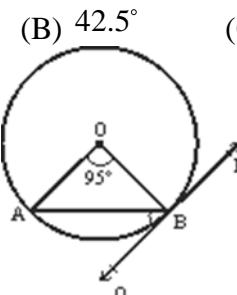

|           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b>  | You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.                                                                            |
| <b>2</b>  | <b>“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under various rules of the Board and IPC.”</b> |
| <b>3</b>  | Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. <b>However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them.</b>                                        |
| <b>4</b>  | The Marking scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.                                                                                                                                                                                                       |
| <b>5</b>  | The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.                      |
| <b>6</b>  | Evaluators will mark ( ✓ ) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating which gives an impression that answer is correct and no marks are awarded. <b>This is most common mistake which evaluators are committing.</b>                                                                                                                                                                                                |
| <b>7</b>  | If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.                                                                                                                                                                                                                                               |
| <b>8</b>  | If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.                                                                                                                                                                                                                                                                                                                                                       |
| <b>9</b>  | <b><u>In Q1-Q20, if a candidate attempts the question more than once (without canceling the previous attempt), marks shall be awarded for the first attempt only and the other answer scored out with a note “Extra Question”.</u></b>                                                                                                                                                                                                                                                        |
| <b>10</b> | <b><u>In Q21-Q38, if a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “Extra Question”.</u></b>                                                                                                                                                                                                                                                                                          |
| <b>11</b> | No marks to be deducted for the cumulative effect of an error. It should be penalized only once.                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>12</b> | A full scale of marks _____(example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.                                                                                                                                                                                                                                                                                                            |

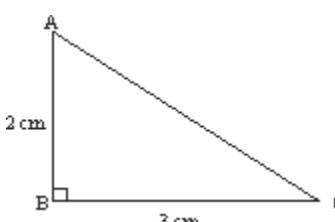

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13 | Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 14 | <p>Ensure that you do not make the following common types of errors committed by the Examiner in the past:-</p> <ul style="list-style-type: none"> <li>● Leaving answer or part thereof unassessed in an answer book.</li> <li>● Giving more marks for an answer than assigned to it.</li> <li>● Wrong totaling of marks awarded on an answer.</li> <li>● Wrong transfer of marks from the inside pages of the answer book to the title page.</li> <li>● Wrong question wise totaling on the title page.</li> <li>● Wrong totaling of marks of the two columns on the title page.</li> <li>● Wrong grand total.</li> <li>● Marks in words and figures not tallying/not same.</li> <li>● Wrong transfer of marks from the answer book to online award list.</li> <li>● Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)</li> <li>● Half or a part of answer marked correct and the rest as wrong, but no marks awarded.</li> </ul> |
| 15 | While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 16 | Any un assessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 17 | The Examiners should acquaint themselves with the guidelines given in the " <b>Guidelines for spot Evaluation</b> " before starting the actual evaluation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 18 | Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 19 | The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Sol.   | Correct graph of both the equations.<br>Solution of equation is $x = 3, y = -4$                                                                                                                         | 1                                                                |

**OR**

25(b). Using graphical method, find whether following system of linear equations is consistent or not:

$$x = 0 \text{ and } y = -7$$

Sol.

Correct graph of  $y = -7$  and  $x = 0$

1

As  $y = -7$  is intersecting  $x = 0$  at  $(0, -7)$

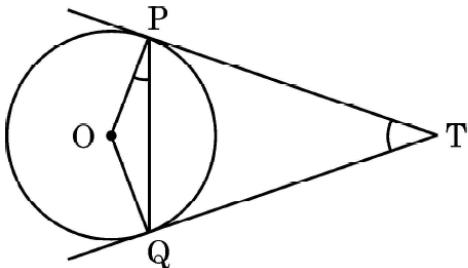

1

So system of equations is consistent

**SECTION C**

This section comprises of Short Answer (SA) type questions of 3 marks each.

26(a). Two tangents TP and TQ are drawn to a circle with centre O from an external point T. Prove that  $\angle PTQ = 2\angle OPQ$ .

Sol.

$$TP = TQ$$

1

$$\Rightarrow \angle TPQ = \angle TQP$$

Let  $\angle PTQ$  be  $\theta$

$$\Rightarrow \angle TPQ = \angle TQP = \frac{180^\circ - \theta}{2} = 90^\circ - \frac{\theta}{2}$$

1

$$\text{Now } \angle OPT = 90^\circ$$

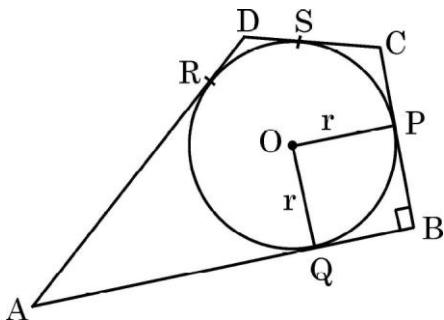

$$\Rightarrow \angle OPQ = 90^\circ - (90^\circ - \frac{\theta}{2}) = \frac{\theta}{2}$$

$$\angle PTQ = 2 \angle OPQ$$

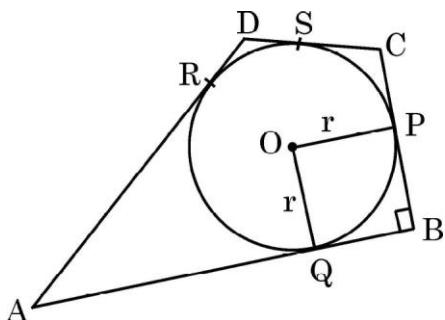

1

**OR**

26(b). In the given figure, a circle is inscribed in a quadrilateral ABCD in which  $\angle B = 90^\circ$ . If  $AD = 17$  cm,  $AB = 20$  cm and  $DS = 3$  cm, then find the radius of the circle.

Sol.

$$DR = DS = 3 \text{ cm}$$

$\frac{1}{2}$

$$\begin{aligned} \therefore AR &= AD - DR = 17 - 3 = 14 \text{ cm} \\ \Rightarrow AQ &= AR = 14 \text{ cm} \end{aligned}$$

$\frac{1}{2}$

$$\therefore QB = AB - AQ = 20 - 14 = 6 \text{ cm}$$

$\frac{1}{2}$

$$\text{Since } QB = OP = r \quad \therefore \text{ radius} = 6 \text{ cm}$$

$\frac{1}{2}$

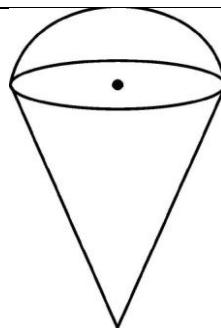

27. **Prove that:**  $2(\sin^6 \theta + \cos^6 \theta) - 3(\sin^4 \theta + \cos^4 \theta) + 1 = 0$ .

Sol.

$$\begin{aligned} \text{LHS} &= 2(\sin^6 \theta + \cos^6 \theta) - 3(\sin^4 \theta + \cos^4 \theta) + 1 \\ &= 2[(\sin^2 \theta)^3 + (\cos^2 \theta)^3] - 3(\sin^4 \theta + \cos^4 \theta) + 1 \\ &= 2[(\sin^2 \theta + \cos^2 \theta)(\sin^4 \theta - \sin^2 \theta \cos^2 \theta + \cos^4 \theta)] - \\ &\quad 3(\sin^4 \theta + \cos^4 \theta) + 1 \end{aligned}$$

| 29.  | If $(-5, 3)$ and $(5, 3)$ are two vertices of an equilateral triangle, then find coordinates of the third vertex, given that origin lies inside the triangle. (Take $\sqrt{3} = 1.7$ )                                                                                                                                                                                                                           |                      |

Sol.

Let the third vertex be  $(x, y)$ A  $(-5, 3)$  B  $(5, 3)$  C  $(x, y)$ 

$$AB = 10 = AC$$

1

$$AC^2 = 100$$

$$(-5-x)^2 + (3-y)^2 = (5-x)^2 + (3-y)^2$$

1

$$20x = 0$$

$$x = 0$$

1/2

$$(3-y)^2 = 75$$

$$3-y = \pm 5\sqrt{3}$$

$$y = 3 - 5\sqrt{3}$$

$$y = -5.5$$

The coordinates of the third vertex are  $(0, -5.5)$ 

1/2

30.

Prove that  $\sqrt{5}$  is an irrational number.

Sol.

Let  $\sqrt{5}$  be a rational number. $\therefore \sqrt{5} = \frac{p}{q}$ , where  $q \neq 0$  and let  $p$  &  $q$  be co-primes.

1/2

 $5q^2 = p^2 \Rightarrow p^2$  is divisible by 5  $\Rightarrow p$  is divisible by 5

1

 $\Rightarrow p = 5a$ , where 'a' is some integer ----- (i) $25a^2 = 5q^2 \Rightarrow q^2 = 5a^2 \Rightarrow q^2$  is divisible by 5  $\Rightarrow q$  is divisible by 5

1/2

 $\Rightarrow q = 5b$ , where 'b' is some integer ----- (ii)

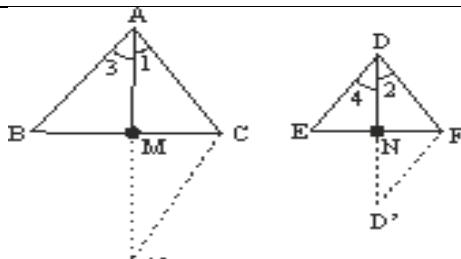

(i) and (ii) leads to contradiction as 'p' and 'q' are co-primes.

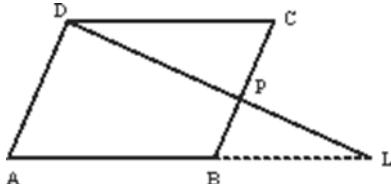

1

 $\therefore \sqrt{5}$  is an irrational number.

|        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                   |

#### SECTION E

This section comprises of 3 case-study based questions of 4 marks each.

36. India meteorological department observes seasonal and annual rainfall every year in different sub-divisions of our country.

It helps them to compare and analyse the results. The table given below shows sub-division wise seasonal (monsoon) rainfall (mm) in 2018:

| Rainfall (mm) | Number of Sub-divisions |
|---------------|-------------------------|
| 200-400       | 2                       |
| 400-600       | 4                       |
| 600-800       | 7                       |
| 800-1000      | 4                       |
| 1000-1200     | 2                       |
| 1200-1400     | 3                       |
| 1400 -1600    | 1                       |
| 1600-1800     | 1                       |

Based on the above information, answer the following questions :

(I) Write the modal class.  
 (II) Find the median of the given data.

OR

(II) Find the mean rainfall in this season.

(III) If sub-division having at least 1000 mm rainfall during monsoon season, is considered good rainfall sub-division, then how many sub-divisions had good rainfall?

Sol. (i) Modal Class is 600-800

1

(ii)  $\frac{N}{2} = 12$ , median class is  $600 - 800$

½

| Rainfall    | $x_i$ | $f_i$ | cf. |
|-------------|-------|-------|-----|
| 200 - 400   | 300   | 2     | 2   |
| 400 - 600   | 500   | 4     | 6   |
| 600 - 800   | 700   | 7     | 13  |
| 800 - 1000  | 900   | 4     | 17  |
| 1000 - 1200 | 1100  | 2     | 19  |
| 1200 - 1400 | 1300  | 3     | 22  |
| 1400 - 1600 | 1500  | 1     | 23  |
| 1600 - 1800 | 1700  | 1     | 24  |
|             |       | 24    |     |

½ for correct table

$$\text{Median} = 600 + \frac{200}{7} (12 - 6)$$

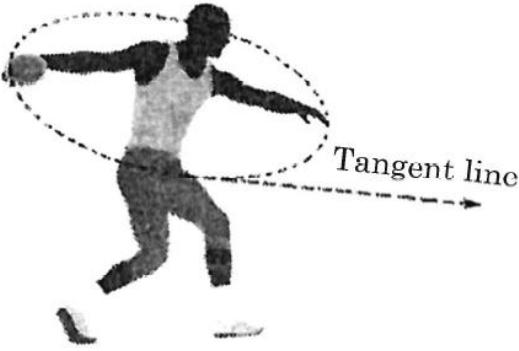

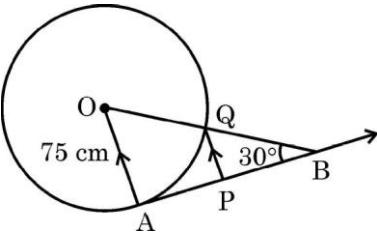

1

$$= \frac{5400}{7} \text{ or } 771.4$$

**OR**

(ii)

| Rainfall  | $x_i$ | $f_i$ | $f_i x_i$ |

|     | (iii) Sub-divisions having good rainfall = $2 + 3 + 1 + 1 = 7$ .                                                                                                                                                                                                                                                                                           |      |       |                     |
| 37. | <p>The discus throw is an event in which an athlete attempts to throw a discus. The athlete spins anti-clockwise around one and a half times through a circle, then releases the throw. When released, the discus travels along tangent to the circular spin orbit.</p>  |      |       |                     |
|     | <p>In the given figure, AB is one such tangent to a circle of radius 75 cm. Point O is centre of the circle and <math>\angle ABO = 30^\circ</math>. PQ is parallel to OA.</p>                                                                                           |      |       |                     |

$$\Rightarrow \frac{1}{2} = \frac{PQ}{75}$$

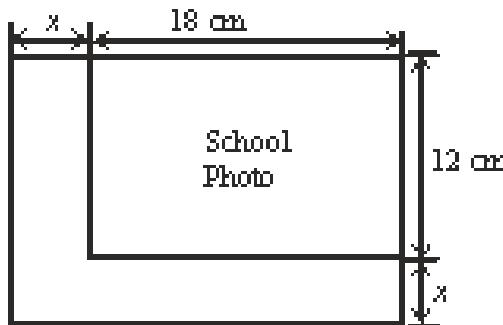

$$\Rightarrow PQ = \frac{75}{2} \text{ cm}$$

1

 $\frac{1}{2}$ 

38. While designing the school year book, a teacher asked the student that the length and width of a particular photo is increased by  $x$  units each to double the area of the photo. The original photo is 18 cm long and 12 cm wide. Based on the above information, answer the following questions:

- Write an algebraic equation depicting the above information.
- Write the corresponding quadratic equation in standard form.
- What should be the new dimensions of the enlarged photo?

OR

Can any rational value of  $x$  make the new area equal to  $220 \text{ cm}^2$
